

Abstract of the Disclosure

Caller information display system includes a caller terminal, a service system and a receiver terminal. The caller
5 terminal stores caller information and transmits data including the caller information during a call. The service system receives the data including the caller information from the caller terminal and transmits the data to a receiver terminal. The receiver terminal receives the data from the
10 service system, stores the caller information to be linked with a telephone number of the caller terminal, and displays the caller information when a paging signal is received.
